Flex-a-Bond Hard Bond Adhesive (with elasticizer)

INSTRUCTIONS

- Prepare the client's head as you would for any track system.
- Apply redline tape temple to temple on the base of the system. Run a very thin bead of Flex-a-Bond adhesive down the center of the redline tape.
- Spread out the Flex-a-Bond adhesive with a small brush, making sure that the adhesive is on the tape only. Set the brush aside.
- Apply the hair system to the scalp. Seat the hair system in place by pulling down with a towel. Check the brush you used to apply the adhesive. When the bristles are hard, the adhesive is cured.
