Phantom Application Instructions

- Do Not Apply Phantom Directly To Lace Base.
 - Always run a patch test before full application.
1. If bonding a skin/polyurethane unit, apply one thin coat on the base. This should always be completed before you start applying Phantom to the scalp.
 2. Apply 4 thin coats of Phantom to the client's scalp, keeping the same quantity of adhesive with each coat. Allow roughly 20 seconds in between coats for each coat to dry.
 3. Once the 4th coat is applied, wait 4-5 minutes for Phantom to completely cure.
 4. The recommended cleaner to remove Phantom from the scalp is Ultra-Safe all natural adhesive remover. To remove Phantom from the hair unit, please use Ghost Buster .
